

All grant applications submitted to a funding agency require a comprehensive and institutional review. The comprehensive review ensures that the research is within the mandate and adheres to the guidelines as specified by the funding agency. Institutional reviews ensure that you are in adherence with policies and procedures for research at Memorial University. It will also specify what resources the Academic Unit will commit if beyond the usual support you receive for being a researcher. Information for institutional review is available at <https://www.mun.ca/research/funding/grants/institutional-review.php>
